

NJABULO SHABALALA

Data Analyst | Power BI · SQL · Excel

Johannesburg | njabuloshabs@icloud.com | [Portfolio](#) | [LinkedIn](#)

PROFILE

Data analyst with a Power BI Data Analyst Associate (PL-300) certification and hands-on experience with SQL, DAX, and Power Query. Built a Power BI order-to-cash model that surfaced a 5% revenue shortfall and an automated document-processing tool for small business owners. I also have a background in organisational research (BA, Rhodes University), which supports structured, evidence-based analysis.

TECHNICAL SKILLS

- **Business Intelligence & Analytics:** Power BI (data modelling, DAX, Power Query), SQL (CTEs, joins, window functions – Postgres/BigQuery), Advanced Excel (pivot tables, lookups, formula auditing)
- **Data Engineering & Pipelines:** Azure Document Intelligence (OCR), Azure Table Storage, API integration (Twilio), workflow automation
- **Data Governance:** Data integrity auditing, database record management, information security fundamentals (SC-900)
- **Tools:** GitHub, Jira Service Management

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Microsoft Certified: Security, Compliance, and Identity Fundamentals (SC-900)

PROJECTS

- **B2B Order-to-Cash Data Modeling (Power BI, DAX, Star Schema)** – Rebuilt a company's disconnected sales data into one clean model so leadership could track revenue targets and delivery efficiency. Found a 5% revenue shortfall and confirmed marketing spend was returning 1.71x.
- **Hi-Fi Org Sales Performance Dashboard (Excel, Pivot Tables, Data Visualization)** – Built an interactive dashboard from raw sales transaction data, allowing stakeholders to filter revenue by region, product, and channel in real time. Found that one product category drove over half of total revenue, and identified the top-performing sales region.
- **Document Automation Tool for Small Businesses** – Independently designed and built a tool that lets small business owners submit documents over WhatsApp and get them automatically read, processed, and confirmed back to them – removing manual data entry from the process.
- **Shipment Data Cleaning Pipeline (Google BigQuery, SQL)** – Cleaned a raw shipment-tracking dataset containing formatting inconsistencies, duplicates, missing values, invalid dates, and numerical outliers. Used window functions for deduplication, IQR-based outlier detection and capping, and safe date parsing to produce an analysis-ready dataset.
- **E-Commerce Sales Funnel Analysis (Google BigQuery, SQL)** – Analyzed user behavior data across the purchase funnel to identify conversion bottlenecks by stage and marketing channel. Translated findings into channel-specific recommendations for marketing, UX, and finance stakeholders.

Full write-ups and additional SQL/Excel projects: see Portfolio linked above.

WORK EXPERIENCE

Administrative Assistant – Golden Stallion Web Agency (GSWA)

Johannesburg | Jan 2025 – Mar 2026

- **Data integrity:** Audited and corrected client and project records across internal databases and CRM systems, catching discrepancies before client-facing use.
- **Reporting:** Built Excel trackers to monitor milestones across concurrent projects, giving team leads a single source of truth for status.
- **Process improvement:** Restructured digital filing conventions across the agency's project archive, reducing document retrieval time and standardising handoffs between teams.

- Coordination: Served as first point of contact for internal queries and managed confidential stakeholder correspondence.

EDUCATION

BA — Organisational Psychology & Political Science

Rhodes University, Makhanda | Graduated 2023

Coursework included quantitative and qualitative research methods, policy analysis, and workplace dynamics.
